

Project Name: Project Broomstick

Week of: 10/1-10/8

Submitted by: Destiny, Alex, and Meghan

Brief Summary: This week was devoted to making a group website and the things that should be featured in it, such as, pictures, screen shots, and videos. We had to work on our system's architecture so that our demo could really focus on the details as well as showcase some marketing.

This week:

(a) Our "wins"

- Marketing
 - o Putting in some graphics!
 - Background
 - Colors
 - Picture of the example 4-4 conducting pattern

(b) Outstanding issues

- Freezing problems

Next week plans:

- GET READY FOR TRUSTEES!
- Website development
- Adding more layers to the "beat game"
 - o Point system?
 - o Visual cues
 - Reacting to the user
 - "Great", "Almost", "Keep trying!"
